CLAVINOVA CLP-725

Clavinova

REAL GRAND EXPRESSION 2

Yamaha Clavinova CLP-700 series converts the slightest variations in touch into a limitless range of sound that captures your individuality as a musician. Thanks to the latest technology, CLP-700 series is as close to acoustic grand pianos as never before. They offer a more wonderful playing experience and taking your expectations of what a digital piano can do to higher heights. The CLP-725 now completes the Clavinova CLP-700 series.

PLAYABILITY

Featuring the GrandTouch-S™ keyboard with a broad dynamic range of touch and response on the level of a grand piano. Excellent consistency and nuanced expression give the pianist the utmost control over touch.

SENSITIVITY

Grand Expression Modeling is a ground-breaking new technology that enables the pianist to use their techniques to produce the limitless tonal variation unique to grand pianos. The ability to vary the intensity and speed of touch to produce different tones adds another dimension to the joy of musical expression.

SOUND QUALITY

The Clavinova CLP-725 faithfully reproduces the dynamic range and diverse tone variation of the powerful, brilliant Yamaha CFX, and the Bösendorfer Imperial with its rich tones and natural-feeling resonance. Virtual Resonance Modeling (VRM) intricately simulates the full sympathetic sounds created by the overlapping resonance of the strings and body of a grand piano. The exquisite piano sound makes every song sound great.

DIGITAL NEVER FELT SO GRAND

GRAND EXPRESSION MODELING

The interaction and interplay of the hammers, dampers, and strings inside a grand piano respond to the subtlest nuances of the pianist's touch, creating a limitless range of tonal expression. Touch refers to the pianist's control, not only of intensity (softness/loudness) in playing and releasing the keys, but also of the speed and depth with which the keys are pressed. The Grand Expression Modeling introduced in the CLP-700 series translates the widely varied input from the pianist's fingers into the same limitless tonal variation of a grand piano.

This makes it possible to vary the output by playing the keys to different depths and with different speeds, even when using techniques such as trills or legato or emphasizing the melody over the accompaniment.

CLAVINOVA DESIGN – SILHOUETTE AND VISUAL ENHANCEMENT

The uniform silhouette of the front end of all models from the CLP-725 to the CLP-795GP is a common feature of the entire CLP series. The power indicator has been moved from the front panel to the on/off switch, positioned to the right of the keyboard. The music rest has been changed

on the CLP-725 and now has the “uniform Clavinova shape”. The design of the control panel in the CLP-725 has also been visually adapted to the line-up. The CLP-725 is available in four colour variations.
